June 06, 2019

Attention: Mrs. Fischer

Subject: May 2019 Monthly Report

On the billing cycle ending on the 23rd of May 26,911,000 gallons of water were used by our consumers, an average of 897,000 gallons was used per day.

On May 6, 2019, collected Trihalomethanes (TTHM's) samples and were sent to Clinical Lab of San Bernardino for analysis. The results came in on May 15, 2019 and were below the maximum contaminant levels (MCL) for TTHM's. The running annual average (RAA) MCL for TTHM's is 80 parts per billion (ppb) and we attained 49 ppb for the Mc Cabe site and 45 ppb for the Little Field site. Heber Public Utility District continues to be in compliance with the State and Federal Water Regulations.

On May 29, 2019 received a high finish water alarm. The level sensor had malfunction causing the water treatment process to shut down. A spare level sensor was in our inventory and was replaced and programmed. The Water treatment process was back in service within a few hours. There was no adverse effect to the water quality or violation because of this incident.

If you have any questions, please contact me at (760) 427-4685

Sincerely,

Francisco Rodriguez
Chief Operator
