May 6, 2015

Attention: Mrs. Fischer

Subject: April 2015 Monthly Report

On the billing cycle ending on the 24th of April 35,351,000 gallons of water were used by our consumers, an average of 1,104,000 gallons was used per day.

On April 5, 2015 operator on-call received a raw water Variable Frequency Drive (VFD) alarm. Upon inspection by Greg Bendly Electric, the VFD was found to be no longer functional. A new VFD was ordered and installed. Currently the new VFD is not communicating with the SCADA system and will be programmed by Alex from ESG upon delivery of needed hardware.

On April 13, 2015 collected the 2nd quarter TTHM's samples and were sent to E.S. Babcock Laboratory for analysis. The results came in on April 24, 2015 and were below the maximum contaminant levels (MCL). Heber Public Utility District continues to be in Compliance.

On April 23, 2015 Brenntag Chemical driver accidentally struck the Ferric Sulfate containment causing damage to the structure and spilling approximately 5 gallons of the chemical. The HPUD operators properly contained the spill and shoveled the affected soil into a 40 gallon plastic container and a couple of five gallon buckets. The Brenntag Company will be properly disposing of the contaminated soil and will also provide containment for the 300 gallon Ferric Sulfate Tank. There were no violations attained because of this incident.

If you have any questions, please contact me at (760) 427-4685

Sincerely,

A handwritten signature in blue ink, appearing to read "Francisco Rodriguez".
