Nov 10, 2015

Attention: Mrs. Fischer

Subject: October 2015 Monthly Report

On the billing cycles ending on the 25th of October 35,704,000 gallons of water were used by our consumers, an average of 1,151,000 gallons was used per day.

On October 15, 2015 took the fourth quarter TTHM's and HAA5 samples from both of our sampling locations. We received results on November 2015 which came higher than normal for the Haloacetic Acids (HAA5) results and exceeded the Operational Evaluation Levels (OEL) of 60ug/l. Although exceeding the OEL is not a violation it is probable for next quarter to be in violations if results continue this high. I spoke with Mr. Ketcham from the State Water Board Division of Drinking Water and he has determined that the cause is the source water and not operational as several other water utilities in the area have high HAA5. He will contact us with some recommendation on how to reduce the HAA5.

On October 17, 2015 isolated pond #2 and #3 to drain pond #1 for maintenance purposes. Currently, Pond #1 sludge is dried up and operators are currently removing the dried sludge with the loader. Pond will be ready by next month on November, will then commence to drain and work on pond #2.

If you have any questions, please contact me at (760) 427-4685

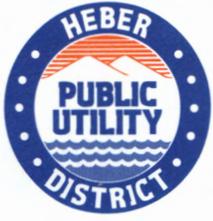

Sincerely,

A handwritten signature in blue ink, appearing to read "Francisco Rodriguez".
