Attention: Mrs. Fischer

Subject: June 2015 Monthly Report

On the billing cycle ending on the 25th of June 42,038,000 gallons of water were used by our consumers, an average of 1,314,000 gallons was used per day.

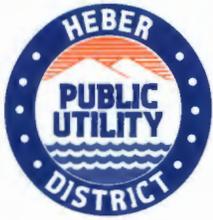

On June 18, 2015 received a call from Imperial County Lab notifying us that one of our routine bacteriological samples resulted positive with coliform, which is an indication of possible bacteria contamination. After repeat samples were taken from original site and upstream and downstream as required by the State Water Resources Control Board (SWRCB), results came back absent, meaning no bacteria was present. I informed Mr. Scott Ketcham from the SWRCB and no further action is required other than reporting results in the Monthly Monitoring Report. There were no violations attained because of this incident.

If you have any questions, please contact me at (760) 427-4685

Attention: Mrs. Fischer

Subject: July 2015 Monthly Report

On the billing cycle ending on the 25th of July 38,541,000 gallons of water were used by our consumers, an average of 1,234,000 gallons was used per day.

On July 3, 2015 operator notice the Hypochlorite tank levels were low. Upon inspection it was noticed that pump which feeds the Hypochlorite cells had malfunctioned. A new spare pump was in our stock and was replaced. The Hypochlorite system is now working appropriately. There was no violation because of this incident.

On July 13, 2015 the filter touch screen which is used control set points malfunctioned, causing the filter to backwash several times. We left the touch screen at the home page tab which prevented the continuous backwashing and the filter resumed normal operation. A new touch screen was ordered and has been installed. There was no violation because of this incident.
