Subject: January 2018 Monthly Report

On the billing cycle ending on the 22nd of January 26,401,000 million gallons of water were used by our consumers, an average of 851,000 thousand gallons was used per day.

On January 8, 2018, collected the 1st quarter Trihalomethanes (TTHM's) and Haloacetic Acids (Haa5) samples and were sent to Clinical Lab of San Bernardino for analysis. The results came in on January 23, 2018 and were once again below the maximum contaminant levels (MCL) for TTHM's. The running annual average (RAA) MCL for TTHM's is 80 parts per billion (ppb) and we attained 43.5 ppb for the Mc Cabe site and 38 ppb for the Little Field site. Heber Public Utility District continues to be in compliance with the State and Federal Water Regulations.

On January 25, 2018, received a hypochlorite system alarm causing the production of hypochlorite to stop. Upon inspection it was notice that the system had a few leaks. Operator tighten the loose hypochlorite cells gaskets and is now working appropriately. There was no violation or water quality issues because of this incident.
