Attention: Mrs. Fischer

Subject: November 2019 Monthly Report

On the billing cycles ending on the 22rd of November 29,230,000 gallons of water were used by our consumers, an average of 974,000 gallons was used per day.

On November 5, 2019, collected the monthly Trihalomethanes (TTHM's) samples and were sent to Clinical Lab of San Bernardino for analysis. The results came in on November 15, 2019 and were below the maximum contaminant levels (MCL) for TTHM's. The running annual average (RAA) MCL for TTHM's is 80 parts per billion (ppb) and we attained 50 ppb for the McCabe site and 43 ppb for the Little Field site. Heber Public Utility District continues to be in compliance with the State and Federal Water Regulations.

On November 19, 2019, the 3-million-gallon tank level sensor send out a low-level alarm. This alarm was triggered by the lightning storm we had at that time and caused a circuit to burn out. This level sensor controls when the water filtration system turns on and off. This signal is now sent by the .75-million-gallon tank level sensor. A new Human Machine Interface (HMI) which is part of the level sensor has been ordered and will be installed as soon as it is delivered. There were no violations or water quality issues because of this incident.

If you have any questions, please contact me at (760) 427-4685

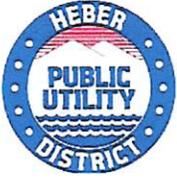

Sincerely,

A handwritten signature in blue ink, appearing to read "Francisco Rodriguez".
