

# Heber Public Utility District

## REPORT TO BOARD OF DIRECTORS

**MEETING DATE:** February 18, 2016

**FROM:** Laura Fischer, General Manager

**SUBJECT:** Approve Purchase of Bleachers and T-Ball Backstop for Tito Huerta Park for an Amount Not To Exceed \$20,000

**ISSUE:**

Shall the Board of Directors approve the purchase of three bleachers and a T-Ball portable backstop for Tito Huerta Park?

**GENERAL MANAGER'S RECOMMENDATION:**

It is recommended that the Board of Directors approve the purchase of three bleachers and a T-Ball portable backstop for the improvements to Tito Huerta Park and for the Heber Little League use.

**FISCAL IMPACT:**

Not to Exceed \$20,000 of Parks and Recreation Unrestricted Fund Balance. The current fund balance in this account is \$507,642.00, which is within the adopted reserve policy.

**DISCUSSION:**

***Bleachers:***

Currently there are wooden bleachers at Tito Huerta Park. See attached pictures of bleachers. The bleachers are in need of replacement as the wood is splinters, split and loose from the framework. The bleachers do not have to be replaced. We could replace only the boards and paint the frame, but these bleachers do not meet current safety standards. It is the best option to replace them with safe, modern and new bleachers.

The bleachers that we propose to purchase would be all aluminum, 5 rows, with safety rails on the sides and back. The bleacher information is as follows:

- 33' for the bleachers on the west side of the field closes to third base. This bleacher will safely seat 98 people and will cost approximately \$6,800.
- 27' for the bleachers just behind home plate. This bleacher will safely seat 78 people and cost approximately \$5,700.
- 15' for the north side of the field closes to first base. This bleacher will safely seat 38 people and costs approximately \$4,200.

These sizes are necessary because they will fit within the retention wall and space that was constructed for existing bleachers. These commercial quality bleachers have a

guardrail system that provides safety for people on all three sides of the bleacher. These bleachers are fully compliant with all health and safety codes.

The bleachers will be shipped to HPUD and staff will construct and install as directed. The shipping will take about one week and we could have the new bleacher up and in use by the beginning of Little League games in March.

### ***T-Ball Backstop:***

There are several options for a T-Ball backstop from a portable net system that cost about \$400 to a more permanent solution costing approximately \$4,000. I have attached some sample products for your review. I am recommending the purchase of a portable chain link backstop that can be moved to accommodate HPUD parks crew and Heber Little League. I spoke with the Heber Little League President and Vice-President and they would like the chain link portable backstop over the net. I have attached some information on sample products and costs. A summary is provided below:

- Bownet Backstop is a portable sports net that is like a pop up tent and easy to use and store. It is 9'6" tall and 17'6" wide and cost about \$500. This backstop will be donated to the Heber Little League and they will take care of putting it up/down and store it as needed.
- The Sandlot Portable Backstop is a combination of galvanized steel poles with heavy duty weather treated nets. It is on wheels and can be rolled into place easily. It is 9' tall and 6' wide side wings that extend to provide up to 28' of backstop. It cost about \$2,000. This backstop will be left out in the park and rolled to the desired location, but can easily be moved for park maintenance.
- Chain Link Backstop Permanent Location with cemented poles has several options to choose from. The one I selected for your consideration is made of 5' panels of galvanized tubing with center reinforced braces and 9 gauge galvanized woven wire. The finished backstop is 10' with a 10' wing on each side for a finished product of 30'. It costs about \$3,000. This backstop will be permanently located just outside the left field fence of the Little League field, which is closest to Hawk Avenue.

The installation of just a portable backstop won't limit the use of the park space for soccer or flag football as there won't be permanent bases or outfield fencing. This will be used for practice and for T-Ball games. The portable backstop can be used anywhere in the park, but the more permanent backstop would be installed on the high ground next to Hawk Street.

### **CONCLUSION:**

The bleachers at Tito Park are in need to replacement and it is the best option to install bleachers that are safe and meet current standards. The Heber Little League has asked for assistance with the T-Ball backstop and it would benefit HPUD and our community to make improvements to Tito Huerta Park baseball fields.

Therefore, staff recommends authorization to purchase three new bleachers and a portable T-Ball backstop for an amount not to exceed \$20,000. The funds to be used from the Parks and Recreation Fund Balance. Upon approval, staff will get quotes from at least three vendors to determine the best price, quality and delivery time.

**ALTERNATIVES:**

- 1) Do not authorize the purchase of the bleachers or T-Ball backstop and direct staff to make repairs to existing bleachers including new wood, hardware and paint. The cost of which may be included in the current parks maintenance budget.
- 2) Do not authorize the purchase of the bleachers, but authorize the purchase of a T-Ball backstop. This alternative could include the amount of money as needed for the style and type desired by the Board which is estimated from \$500 to \$3,000.
- 3) Authorize the purchase of the bleachers, but do not authorize the purchase of the T-Ball backstop. The cost of the bleachers is not to exceed \$17,000.

Respectfully Submitted,

Laura Fischer,  
General Manager

Attachment: Pictures of existing bleachers and sample product description and prices.

## Compliant Aluminum Bleachers

**Model BGS-018**

### Code-Compliant, Aluminum Bleacher Seating for Any Venue

These commercial quality bleachers feature a 4' wide center aisle with mid-aisle handrails. 6061-T6 Aluminum alloy angle frame understructure is ideal for level sites. Attach to a concrete foundation or install with in-ground, earth anchors.

Seat planks are constructed of 2"x10" nominal, extruded 6063-T6 aluminum alloy with a clear anodized finish. Tread planks are constructed of two 2"x10" nominal, extruded 6063-T6 aluminum alloy with a mill finish. End caps attached with tek screws. Riser planks are made of 1"x6" extruded aluminum alloy with a clear anodized finish for under each row.

#### Specifications

- All seat and foot planks accommodate 200 plf across a 6' span with a maximum deflection of 9/16".
- Designed to support, in addition to their own weight, a uniformly distributed live load of not less than 100 psf of gross horizontal

**Model BGS-008**

#### Features

- 4, 5, 8, 10, and 15 Row Units.
- 17" Front Row Seat Height.
- 2" x 10" Nominal Seat Planks.
- 15', 21', 27' & 33' Lengths.
- Towable (5, 8 & 10 Row Only).
- Aluminum Angle Frame Understructure.
- Double Footboards.
- Chain Link or Vertical Picket Guardrail.

projection of the bleachers.

- Designed to resist, with or without a live load, a horizontal wind load of 30 psf of gross vertical projection.
- In addition to the live load, designed to resist sway forces of 24 plf of seat plank in a direction parallel to the length of the seat, and 10 plf of seat plank in a direction perpendicular to the length of the seat.
- Under tested loads, stresses in aluminum members and connections do not exceed those specified for Building Type Structures by the Aluminum Association.

Guardrail system protects all three sides of the bleacher and is available in your choice of chain link or vertical picket construction. The chain link railing is made of 1-5/8" anodized aluminum tubing with end caps at ends of straight runs and elbows at corners. All railing is secured to angle rail posts with galvanized fasteners. Tie-down assemblies consist of a 4-way adjustable aluminum clip, with galvanized nut and bolt and washer for each connection point at each support. The 2", 9 gauge galvanized chain link fencing is fastened in place with galvanized fittings and aluminum ties. Top of railing is 42" above the center of any adjacent seat. The guardrail system has no opening larger than 4" at any location more than 30" above grade including the triangular region underneath the seat formed by the tread and rise.

### Specification Sheet

These bleachers are fully compliant with BOCA, IBC and ICC codes as of 1/1/2010. We recommend you anchor these units to a concrete pad, piers, etc.

It is the buyer's responsibility to check their local building and fire codes to determine the compliance requirements in your community.

### FlexCages Chain Link Backstop -- 10' with Hood & with Wings

#### Product Details:

Permanent backstops are constructed by installing supplied 2-3/8" pipe supports approximately every 10' in concrete footings as shown on installation drawings provided. You then simply bolt factory pre-fabricated 5' x 10' panels in place to create your finished backstop. No more cutting and stretching chain link material in the field. These backstops are extremely durable and allow individual panels to be removed for re-screening or replacement as needed. 10' x 10' with Hood & with Wings

#### Features:

- Prefabricated panels for easy install
- 5' x 10' Panels Composed of 1-5/16" OD galvanized tubing with center reinforcing brace and 9 gauge galvanized woven wire
- 5 Year Limited Warranty

The **Bownet Portable Backstop** is a one-of-a-kind new portable sports net that works great for baseball or softball practice.

The key to the product design is the "bow" in the poles, which allows the poles to flex, and puts less stress on the net.

### Features:

- o Measures 9' 6" tall x 17' 6" wide
- o Great for soft-toss, tee work, infield practice and more
- o Can be used in place of a catcher - great for pitching practice
- o No tools needed and sets up easily in 3 minutes
- o Comes complete with net, ground frame, 4 stakes and composite Bow Poles
- o Comes with free 52" x 16" x 9" carry bag
- o Durable and Stable
