Attention: Mrs. Fischer

Subject: January 2014 Monthly Report

On the billing cycle ending on the 24<sup>th</sup> of January 26,368,000 million gallons of water were used by our consumers, an average of 878,933 thousand gallons was used per day.

On January 22, 2014 the hypochlorite cell was disassembled by the HPUD operators to replace worn down parts as recommended by the manufacture. The hypochlorite system was out of service for only one day. The injection of chlorine to the finished water never ceased as we have enough chlorine supply in two storage tanks for a few days.

On January 30, 2014 installation of the distribution rotating assembly was installed by the manufacture Barret Pumps. Both of the HPUD distribution pump now have larger diameter impellers that will allow more flow throughout the distribution system which includes the Imperial Center. As you are aware even before the installation of the second larger impeller we had already met the fire flows to Imperial Center, now with the increased size of both impellers we should be able to continue to meet the fire flows.

On January 31, 2014 Pond #1 (eastern pond) was drained in order to remove the sediment once it dries up. The dried sediment will be removed by using the backhoe and piling it up on site. After removing the sediment from the pond, a dump truck will be rented to transport all of the sediment to HPUD property west of the waste water plant. By mid-February we should have the pond filled up and operational.

If you have any questions, please contact Francisco Rodriguez at (760) 427-4685
