April 7, 2014

Attention: Mrs. Fischer

Subject: March 2014 Monthly Report

On the billing cycle ending on the 26<sup>th</sup> of March 30,470,000 gallons of water were used by our consumers, an average of 1,010,566 gallons was used per day.

On March 7, 2014 Hypochlorite pump check valve plugged up, preventing the injection of chlorine to the finish water. This happened during the morning operations and was immediately repaired. There was no adverse effect to the water quality because of this malfunction.

On March 15, 2014 a suspected electrical glitch caused one of the distribution pumps to trip. The operator on call responded immediately, but HPUD lead operator was in the area and had reseted the pump before the on call operator. Scada graphs show only one pump tripping and the other pump turned on immediately after the other pump had tripped. This incident caused low water pressure in the distribution system for a few minutes and the On-Call Operator received 15 customer complaints.

If you have any questions, please contact me at (760) 427-4685

Sincerely,

A handwritten signature in blue ink, appearing to read "Francisco Rodriguez".

Francisco Rodriguez  
Chief Operator  
Heber Public Utility District
